The Most Impressive Before And After Home Renovations We Saw In 2020

Office Before

After purchasing this waterfront property in Highland Beach, Florida, the homeowner wanted something more than the developer-standard finishes it came with. To give the stark rooms new life, he enlisted interior designer Allen Saunders to help.

Saunders not only decided to reimagine the layout of the space, but also implemented new lighting, finishes, and cabinetry to give the condo a full-scale interior renovation.

Office After

With Saunders' help, this room is essentially unrecognizable. The office area got a dose of warmth thanks to its bronze tones, along with visual interest from the cool light fixture. Softer textures and lines like the blue rug and rounded table help keep the modern space from feeling too stark.
